

Layers and Their Behaviors

Trevor Wernisch

CREATIVE DIRECTOR

www.No-Tec.com

Overview

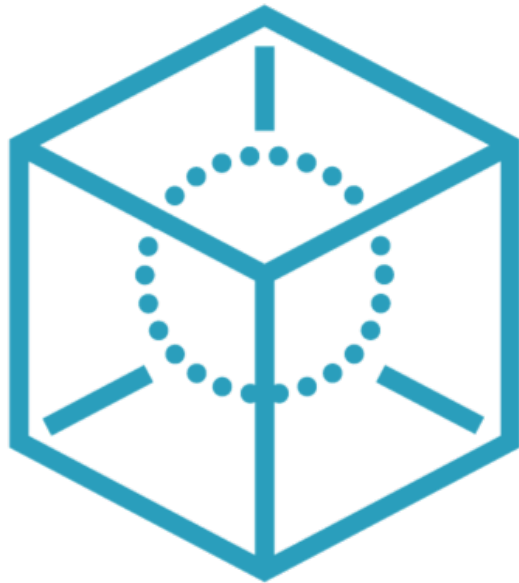

How layers are created, organized and maintained

Layer attributes and styling them

Arrangement to help design faster

Constraints

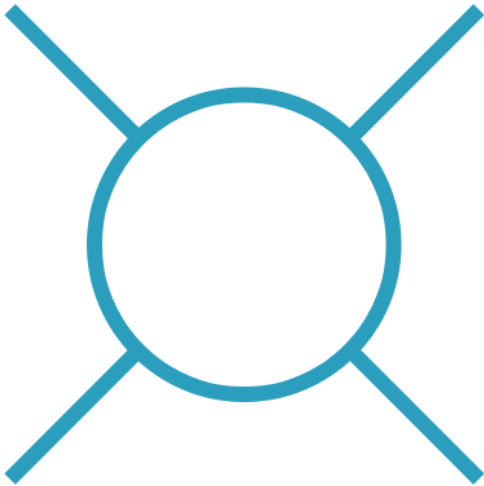

We must ensure our designs display correctly on all screen sizes and ratios

Creating multiple designs for this is not sustainable

Constraints allow us to design once and create reactive and elastic systems

Guides

Guides help align layers and objects throughout our projects

Thin red lines that ensure everything can be precisely where you want them

Guides don't appear on exported assets

Summary

Overview of constraints

How layers work, with regards to ordering, organizing and stacking

Layer properties and styles

Using grids for consistent, aligned and polished design
