

Components and Styles

Trevor Wernisch

CREATIVE DIRECTOR

www.No-Tec.com

Overview

Components are UI elements that can be reused

Similar to text and fill styles

Components can consist of anything

How Components Work

Components

Anything we do to a master component, including adding constraints, will transfer over to any instances of it as well

Summary

Basic component creation

Organizing, updating and keeping safe

Properties that can be overwritten

Advanced components with multiple
updatable layers

Components within components
